

DOOR BUFFER - BI-MATERIAL

The door bumper **BI-MATERIAL** is the result of a particular technology that allows to melt together two different materials: one stiff and the other extremely tender. The stiff part allows an easy and safe placing on the hole side, both manual and by an automatic machine.

Rubber
Engineering plastic

DRILLING PLAN

DETAILS

The stiff part allows an easy and safe placing on the hole side, both manual and by an automatic machine.

When the door closes, the impact of the door is sensibly absorbed by outer tender bumper.
